July 2022

Media de columnas meanK y MedSpeed

Description

Given n numeric columns, this method computes the mean value for each of them and graphs those means in a bar chart

Parameters

Graphic properties

- *Colour*: Colour of the bars in the bar chart
- *Title*: Title of the bar chart

Result

A bar chart graphic in pdf format

Constraints

The columns must be of numeric values

Implementation

To calculate the mean of each column, all the values are summed after being divided by the number of elements in the column
